bp pulse

pulse50 quickstart guide

Before you charge

1 Make sure the unit is safe to use

To start charging

1
Place your access card or key fob on the reader; or open the bp pulse app.

2
Select the correct charging option for your electric vehicle (EV).

3
Connect your vehicle using the cable selected.

4
If you have selected the CHAdeMO cable, you will need to use the press-release button.

5
The unit will run a safety check and then start charging.

To finish charging

1
Place your access card or key fob on the reader; or press stop in the bp pulse app.

2
Remove the cable from your EV and place it back into the charging unit.

3
If your cable will not release, call our 24/7 customer support line. Do not press the emergency support button unless there is an emergency.
